

مخطط المعمارية — نظام PMS

React 19 + Laravel 10 + MySQL + Sanctum + Google Gemini | Multi-Tenant

1. المعمارية العامة (High-Level)

2. Multi-Tenant — عزل الجامعات

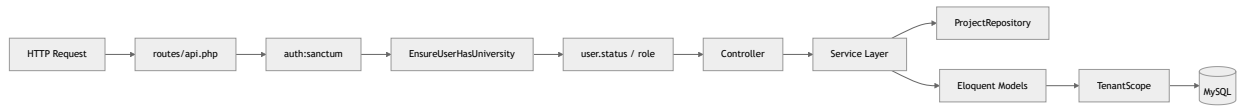

الدور	الطبقة	الوصول
super_admin	PlatformAdminController	كل الجامعات
admin	UserController	مستخدمي جامعته فقط
student / supervisor	ProjectController + Services	بيانات جامعته (TenantScope)

Admin 2.1 كل جامعة

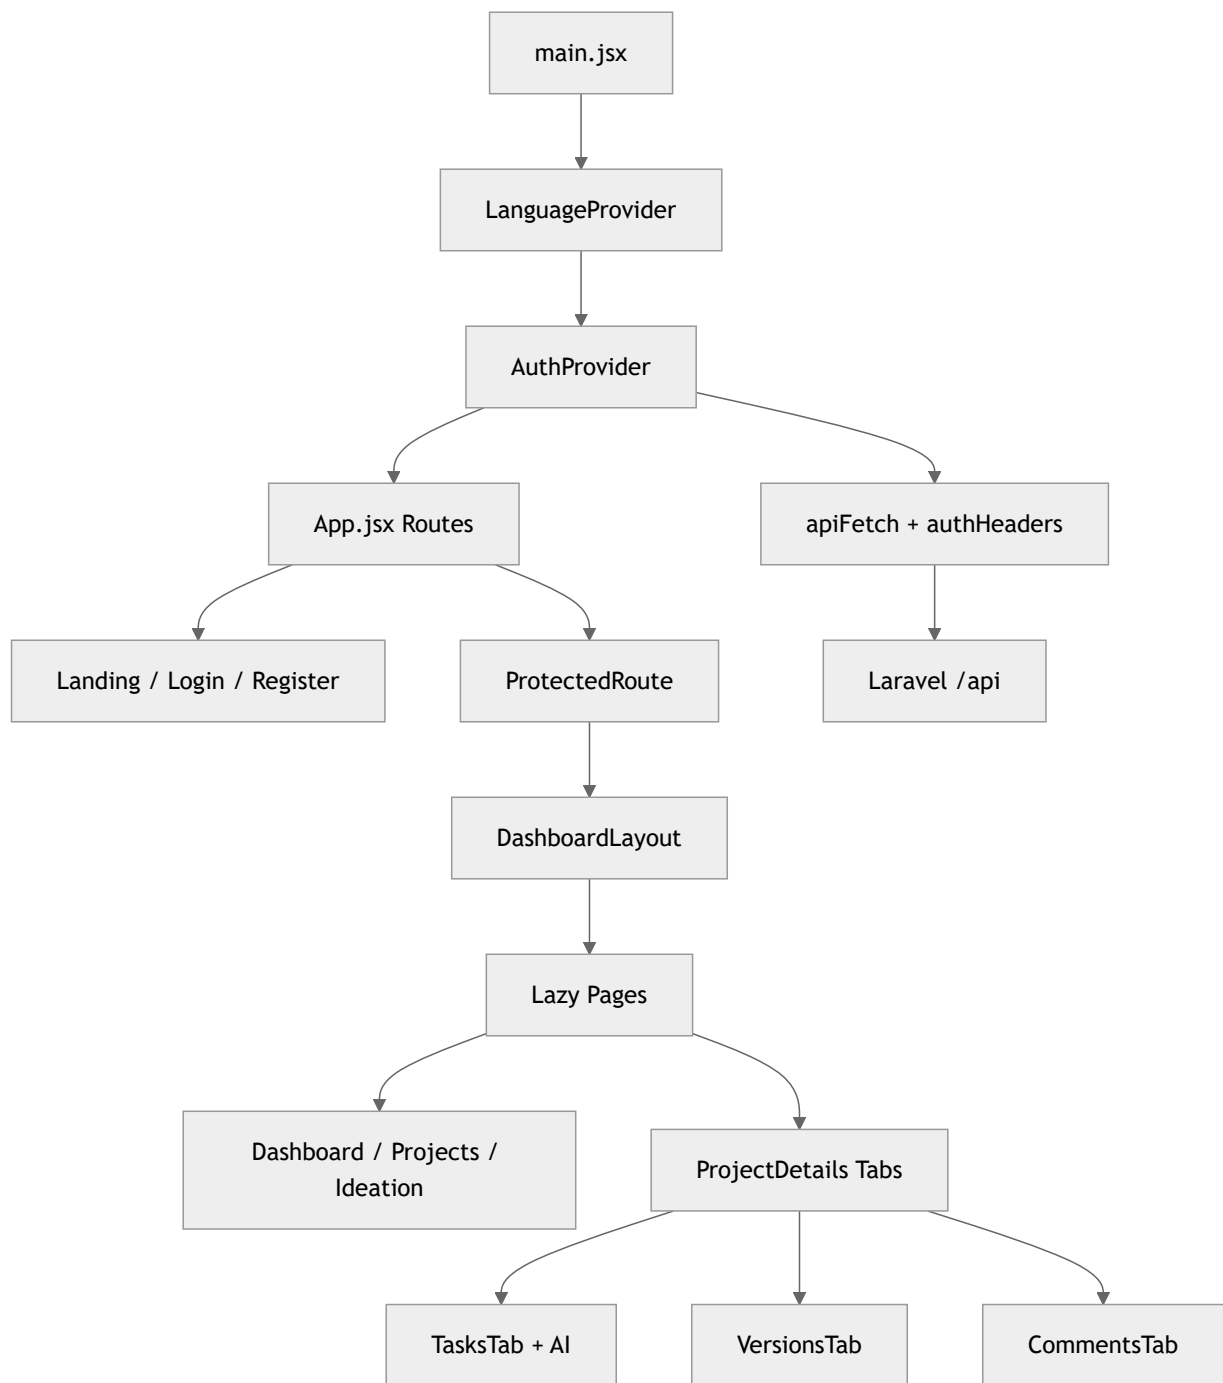

لا يوجد جدول `admins` — `Admin` = `users` + `roles.name = admin` + `university_id`

Laravel طبقات — Backend Layers .3

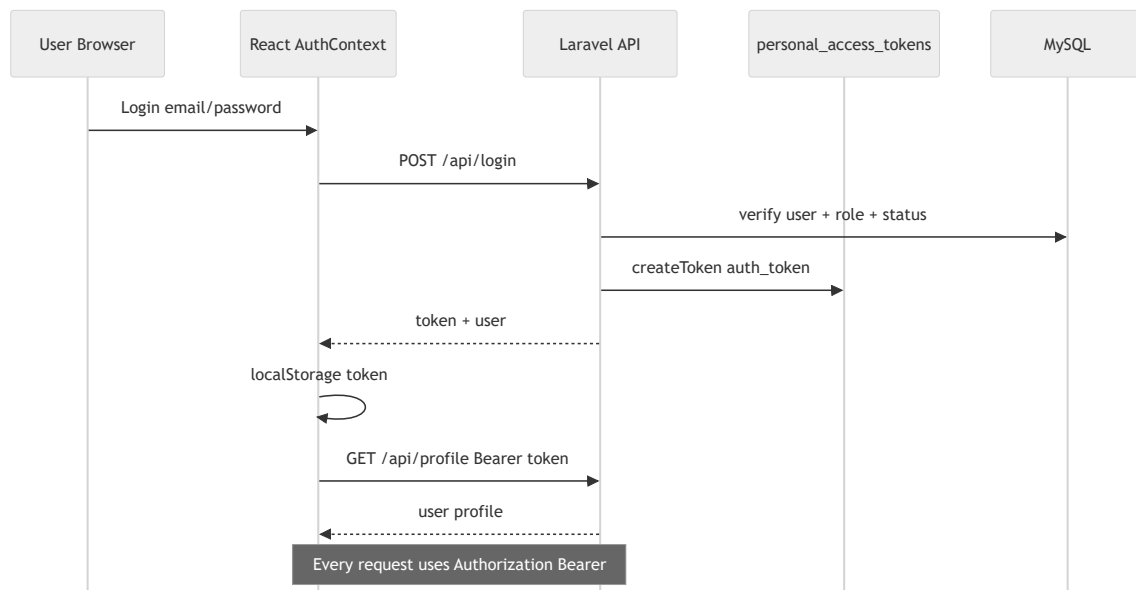

المسؤولية	Service	Controller
Login / Register / Token	AuthService	AuthController
CRUD Projects	ProjectService	ProjectController
CRUD Tasks	TaskService	TaskController
Ideas via Gemini	AIIdeationService	AIIdeationController
Task generation via Gemini	AITaskService	AITaskController
Tenant user admin	UserDeletionService	UserController
Platform-wide admin	direct + services	PlatformAdminController

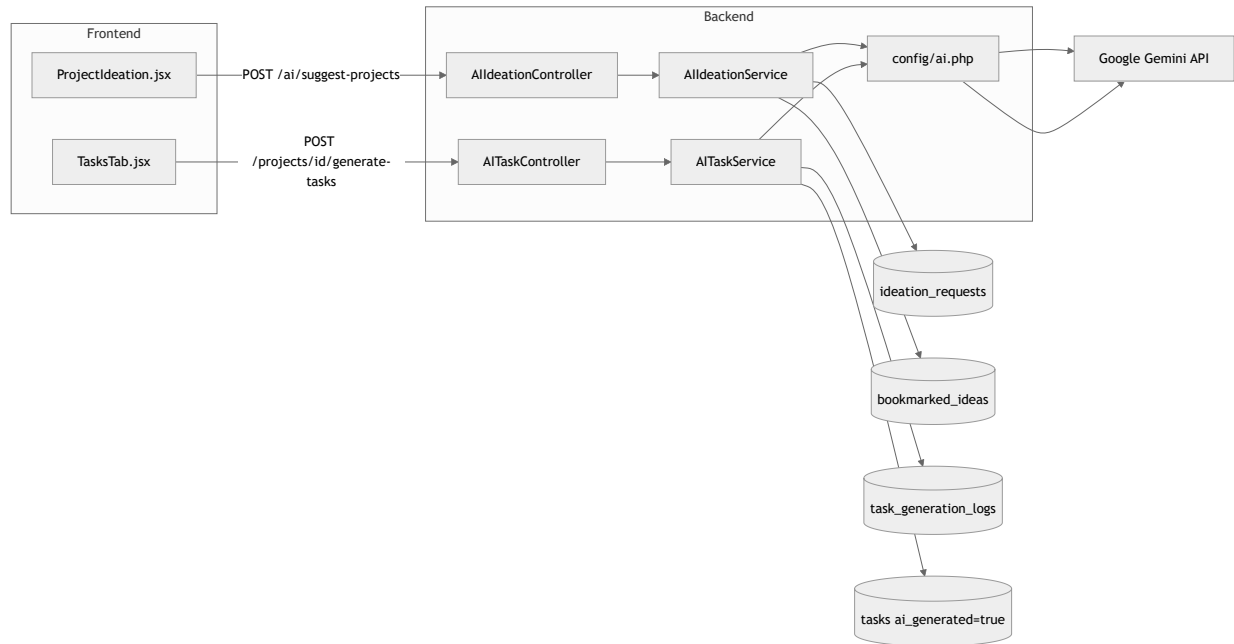

Frontend Architecture — React .4

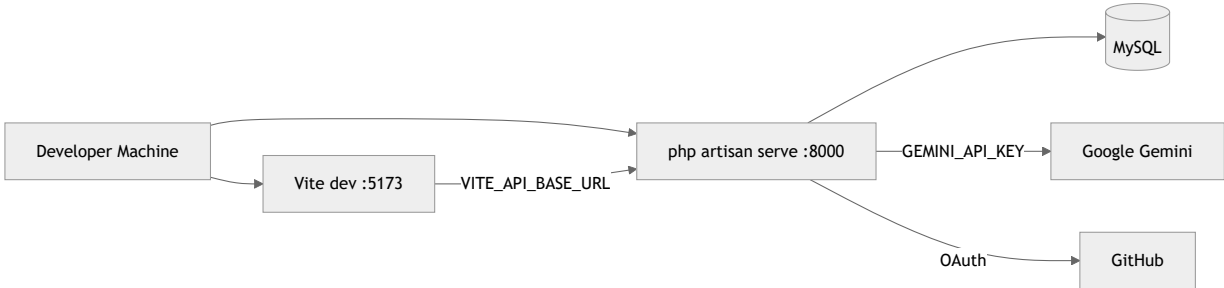

Authentication Flow — Sanctum .5

AI Architecture — Gemini .6

7. Deployment View — نشر محلي

المكوّن	المسار / الأمر
Backend	<code>php artisan serve — backend last/</code>
Frontend	<code>npm run dev — frontend/</code>
Database	<code>php artisan migrate --seed</code>
AI Key	<code>in .env GEMINI_API_KEY</code>

Design Patterns المستخدمة .8

أين	Pattern
app/Services/*	Service Layer
ProjectRepository	Repository
Laravel constructor injection	Dependency Injection
on Project/Task TenantScope	Global Scope
BelongsToUniversity, ApiResponseTrait	Trait Composition
ProtectedRoute, SuperAdminRoute in App.jsx	Route Guards
AuthContext, LanguageContext, ThemeContext	Context Provider

PMS System Architecture — companion to PMS-ERD.dbml
